

# 20' CONTAINER TANK 12.000 LITER

## Container Tank ADR

This solution consists of multiple ADR-certified IBCs and is ideal for the rapid transportation of large volumes of fuel.

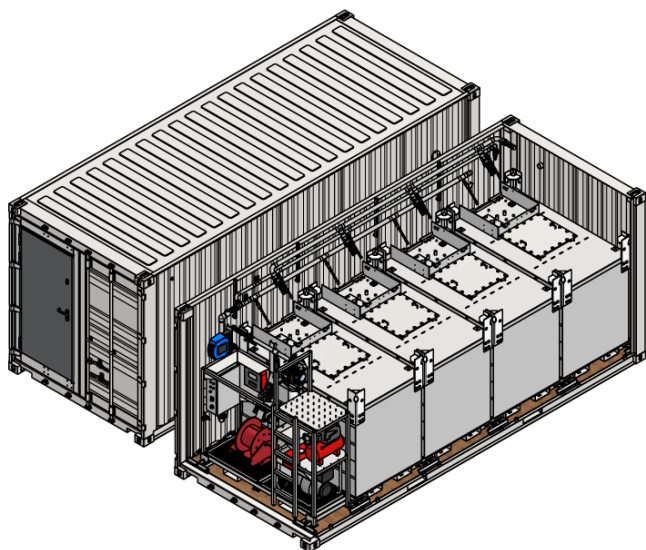

With options ranging from a single 2,500 l IBC in a 10' container up to nine 3,000 l IBCs in a 40' HC container, we can configure this solution to your exact needs.

As each tank is ADR certified, this solution can be transported filled with fuel. All tanks can be connected to work as one large tank with simple filling and suction lines, making it user-friendly.

Different fuels can be stored in the different tanks, making it very versatile.

Our Container Tank is perfect for:

- Defence
- Construction sites
- Backup Power/Energy reserves
- Emergency Management
- Municipalities

## Certifications & approvals

**ADR** (European regulations for international road transport of diesel etc.)

**RID** (international regulations for rail transport of diesel etc.)

**IMDG** (code for international maritime transport of diesel etc.)

**PEFC** (PEFC is a system for sustainable forestry certification)

**CSC** (depending on configuration)

**EN1522 BR7** (depending on configuration)

## About MPP

MPP is a family-owned company in Fjärås in Western Sweden, and has been operating in the Scandinavian market since 2004

We manufacture approved mobile diesel tanks, fuel stations and stationary fuel tanks that are developed for the Nordic climate.

We mainly work with companies involved in rental, construction, haulage, forestry and agriculture which, like us, have high standards in terms of quality, safety and the environment.

MPP is a committed partner whose products – from mobile fuel tanks to complete fuel stations – are safe and easy to use.

Our brand promise is: **Fuel management in a safe and convenient way**

## Below are some components that make this the ideal mobile fuelling station:

- Generator for self-sustained operations
- 40l/min Handpump for when no power is available
- Fuel filter
- Onboard Compressor
- 15m Hose reel with Automatic pistol
- Fleet fuel terminal
- Bund alarms

## General overview

### Example shown in configuration:

Length:	Width:	Height:	Weight:
6.058mm	2.438mm	2.591mm	Ca. 7 ton
