

# Aluminium pickup tank

When lightness matters!

## Smart fuel transport and storage

Our aluminium pickup tank is a safe and flexible helping hand at work. Its tall narrow shape and lightweight material can make a big difference on your loading platform, with reduced vehicle wear and more space for other equipment.

MPP's aluminium pickup tank is right for you, especially if you are in:

- Civil engineering
- Forestry
- Haulage

### Certifications and approvals

The product is approved as an IBC container (IBC = Intermediate Bulk Container) in accordance with the following rules and recommendations:

**UN** (UN recommendations for transporting diesel, etc.)

**ADR** (European rules for the land transport of diesel, etc.)

**RID** (international rules for the rail transport of diesel, etc.)

**IMDG** (code for the international sea transport of diesel, etc.)

**PEFC** (PEFC is a system for certifying environmentally friendly forestry)

### About MPP

MPP is a family-owned company in Fjärås in Western Sweden, and has been operating in the Scandinavian market since 2004. We develop and market portable fuel tanks, diesel storage tanks and fuel installations, for the safe storage, handling and transport of fuels. We mainly work with companies involved in rental, construction, haulage, forestry and agriculture which, like us, have high standards in terms of quality, safety and the environment.

Our brand promise is: **Safe and flexible fuel handling.**

## Portable and flexible, for easy handling

The pickup tank's smart design makes it safe, flexible and easy to handle. The four handles mean it is easy to lift, and the lightweight material makes a big weight difference on your pickup platform, for example, helping to reduce vehicle wear. The tank also has our innovative protective runners with associated brackets allowing permanent lashing to the platform.

## Smart design that saves space

The tank is designed to be tall, leaving more space free for transport. The pump is fitted to the front for easy access, and the holders for the refuelling hoses and diesel handle can be positioned wherever is most convenient. The upper rim has fixing brackets on all sides.

## IBC tank with registered design and no expiry date

UN/ADR certified IBC tanks made of plastic have a certification time limit of up to five years. Because our tank is made entirely of aluminium, there is no such best-before date for certification. The tank material is maintenance-free too, keeping the fuel clean while it is being stored. The pickup tank is protected with a registered design in the EU and Norway.

## Tank specifications

Product number:	101517	101518	101519	100999
Description:	Aluminium pickup tank 150 l	Aluminium pickup tank 250 l	Aluminium pickup tank 360 l	Aluminium pickup tank 400 l
Code:	PTA15-L	PTA25-L	PTA36-L	PTA40
Volume, 96% (l)*:	145	250	355	408
Length (mm)**:	1030	1030	1030	1030
Width (mm)**:	323	533	730	730
Height (mm)**:	720	720	720	814
Net weight (kg)**:	42,5	52,5	59,8	66,8

\* Calculated volume. \*\* Stated dimensions +/-10 mm.

\*\*\* Calculated fully equipped with pump equipment fitted.

## Standard equipment

Lifting and lashing brackets on all four sides.

Protective feet with fixing brackets for the platform.

Fitted ball valve and hose connector for 3/4" supply.

2" analogue level sensor, 2" tank cap, 1" over-pressure/vacuum valve.

Upper rim with fixing brackets for refuelling hose and diesel handle holder.

## Accessories

- Pump package 12 V, 36 l/min\*
- Pump package 24/12 V, 39/22 l/min\*
- Runners to raise height (for fork lifts), 400 l

### Product number:

100231  
101016  
100134

\* Package including automatic refuelling nozzle, 4 metres of refuelling hose, 4 metres of cable with battery connectors, 1 holder for diesel handle (attached to right), 1 holder for refuelling hose with bolts and lock nuts.
